

LANSORB UV-531

2-Hydroxy-4-N-Octyloxybenzophenone

CAS No. 1843-05-6

Specifications:

Tests	Specification
Appearance	Pale greenish yellow powder
Assay	≥99.0%
Melting range	47.0~49.0°C
Light transmittance (450nm)	≥90%
Light transmittance (500nm)	≥95%
Loss on drying	≤0.50%
Ash	≤0.10%

Package: 25Kg/Carton

Application:

- This product is a light stabilizer with good performance, capable of absorbing the UV radiation of 240~340 nm wavelength. It can protect the polymer to its maximum extent, helps to reduce the color. It can also delay the yellowing and obstacle the loss of its physical function.

Storage: Must be stored in closed containers in dry cool conditions.

Recommend Shelf Life: 12 months.
